

## Driver & Software Matrix for IT Admins

This page provides a search tool for current driver, BIOS, and firmware updates for specified Lenovo PCs. You can specify your PC model by selecting the series and sub-series by clicking on the *All Content by Sub-series* tab. You can also specify your PC model by entering the four-character Machine Type on the *All Content by Machine Type* tab. The *Only Docking Critical Updates* tab is specifically for ThinkPad models and you can search simply by selecting the model on that tab.

Each search option allows you to pick a date in the past and the search results will display with any updates released after that date highlighted in bold text. If you would like to generate a Comma Separated Value text file of the search results, check the box next to *Export to CSV* before clicking the Submit button.

Supported Browsers: IE9+, FF, Chrome

All Content by Sub-series	All Content by Machine Type	Only Docking Critical Updates
<div> <input type="text" value="12YN"/> <input type="text" value="Win11"/> </div>		
<p><b>Highlight</b> packages released after: <input type="text"/></p> <p><input type="checkbox"/> Export to CSV</p> <p><input type="button" value="Submit"/></p>
